Experience

Amphenol Network Solutions
Senior Accountant **Liberty Lake, WA** **May 25 to November 25**

- Developed an Excel Power Query to clean and transform data for expense report analysis and journal entries leading to discoveries of non-adherence to company policies and IRS guidelines which then could be addressed as well as resulted in time savings, consistency, and more accurate data for expense report processing
- Created SQL for research purposes as well as for development of future reporting
- Utilized existing Tableau reporting to obtain data and provided feedback when data appeared incorrect or missing
- Analyzed data from Avalara tax reporting software in Excel (Pivot Tables, vlookup, xlookup, etc.), found incorrect inputs of data from prior reporting periods which then could be reviewed and tax returns amended or filed as applicable
- Reviewed changes in inventory costing by extracting data from Tableau and Epicor (ERP system) and analyzing in Excel, investigated significant fluctuations and reported to management
- Evaluated and implemented process improvements to existing processes resulting in time savings and inaccuracies being found and corrected in tools such as complex Excel workbooks used for costing calculations
- Mentored finance personnel
- Participated in user testing of computer applications and month end activities such as not limited to balance sheet reconciliations and journal entry preparation

Robert Half (Bay Shore Systems)
Senior Accountant **Rathdrum, ID** **January 25 to March 25**

- Temporary contract to assist Controller with accounting tasks as needed which included GAAP research, Sales Tax reconciliations, GST reporting, Property Tax reporting, Budget preparation, etc.

Treasury Services Manager

- Led a team of 10 reconcilers and accounting personnel processing over $1 billion per month, over 700,000 transactions, spanning across multiple systems and banks in both U.S. and Canadian currency
- Queried and analyzed large complex data sets using SQL and Excel to identify trends for decision making, to pin point data mismatches, irregularities and/or errors in payment processing, banking data, reconciliations etc. then analyzed root causes
- Identified and implemented numerous process improvements creating auditable processes, identifying time efficiencies, increasing accuracy, developing monitoring, recognizing cost savings, allowing employee growth, etc.
- Created dashboards and reports for business monitoring and decision-making using SQL, Excel and Power BI
- Presented findings to senior management and utilized in team discussions for prioritization and focus
- Mentored reconciliation and accounting personnel
- Collaborated across various teams (technical and non-technical) to share knowledge to assist in process improvements and to troubleshoot and resolve issues as they occurred and/or proactively to head off potential issues
- Cultivated collaboration and teamwork with internal and external stakeholders
- Participated in User Acceptance Testing and generated test plans to ensure that business needs were met and risks addressed with system roll outs

Clearwater Paper Corporation **Spokane, WA** **November 15 to July 19**
Auditor II

- Conducted risk assessments and developed audit plans to identify areas for review
- Conducted audits of financial, operational, compliance and IT processes to evaluate effectiveness of internal controls
- Prepared audit reports summarizing findings, recommendations, and corrective actions
- Communicated audit results and recommendations to management and external auditors
- Followed up on audit findings to ensure timely remediation
